Aconiño

An association offering highly personalized treatment
to children with Cerebral palsy

WHO WE ARE

We are an institution with 21 years of experience that contributes to the improvement of quality of life of the user and their family. Our team of professionals comprises physiotherapists, speech therapists, occupational therapists, a psychologist and a special-needs teacher.

OUR USERS

New-born babies to children aged 18,
diagnosed with
hypotonic cerebral palsy, West syndrome
and other disorders of the central
nervous system.

COMPREHENSIVE TREATMENT

The aim of our service is to not only treat the child but also assist the family based on an assessment of the child's needs and family expectations in order to improve the quality of life of both child and family.

Therapeutic sessions

To support the child's development regarding movement, communication and cognition based on the child's needs and family expectations.

2. HOME VISITS

To support the family based on an understanding of its structure, function, strengths and needs. In so doing our team of professionals can elaborate strategies aimed at improving the family's quality of life.

3. RECREATIONAL ACTIVITIES

We arrange activities in recreational and green spaces which children and their families can together enjoy and relax in, to promote positive interactions between all children and parents.

4. COURSES FOR FAMILIES

We lead workshops aimed at empowering the family and offering tools to improve interfamily relationships, decision-making and ways to establish clear roles within the family.

5. OTHER ACTIVITIES

We promote relations between families through organizing celebrations; e.g. 'family day', Halloween and traditional Christmas events.

HOW TO SUPPORT US

- Support a child's treatment.
- Help us obtain our own premises.

With your donations, we will succeed.
